AFFIDAVIT IN SUPPORT OF SEARCH WARRANT

STATE OF TENNESSEE, COUNTY OF KNOX

FILED
BY MIKE HAMMOND

JAN 09 2025

Personally appeared before Hector I. Sanchez, Judge
of the Knox County Criminal Court for said State, the undersigned, **Detective David West of the Knox County Sheriff's Office**, and now makes oath in due form of law that there is probable and reasonable cause to believe that evidence of criminal conduct will be found upon or within the item and/or location described in **Attachment A** of this search warrant and the criminal conduct will constitute violations of one or more of Tennessee state laws as set forth in TCA Sections, 39-17-401 of the Tennessee Tenn. Code Ann. & Tennessee Drug Control Act of 1989. The evidence to be searched for is fully described in **Attachment B**.

Statement of Facts In Support of Probable Cause

This affidavit is made by **Detective David West**, who now testifies herein which is based upon information personally observed or received from other law enforcement officers, unless otherwise stated, which your Affiant believes to be true, and is as follows:

BACKGROUND AND EXPLANATION OF INSTAGRAM

Instagram is a social networking app, owned by Meta Platforms Inc., made for sharing photos and videos from a smartphone. Similar to Meta or Twitter, everyone who creates an Instagram account has a profile and a news feed. When a user posts a photo or video on Instagram, it will be displayed on their profile. Other users who follow a specific Instagram user will see that specific Instagram user's posts in their own feed. Similar to other social networks, users interact with others on Instagram by following them, being followed by them, commenting, liking, tagging and private messaging.

Instagram can be accessed on the web from a computer, but users can only upload and share photos or videos from their devices. Instagram profiles allow the user to provide their name, a photo, a short bio, and a website link. Every user profile has a "Followers" and "Following" count, which represents how many people they follow and how many other users are following them. Every user profile has a button you can tap to follow them. If a user has their profile set to private, they will need to approve your request first. Additionally, users can edit and apply filters to the photos, fill out a caption, tag other users to it, tag it to a geographical location, and post it to some of the user's other social networks.

On several occasions over course of December of 2024, I was conducting online surveillance of suspected gang members and associates. I reviewed publicly viewable content posted to the Instagram account identified by username "srt_daevon". This Instagram account is known to myself and other Detectives to be operated by Daevon Saint-Germain (Daevon). Daevon is an associate of the Murdville Mafia street gang which is a subset of the 98 Main Street Mafia Crips that operates primarily in the Montgomery Village housing development in south Knoxville.

During my surveillance of the Instagram account, srt_daevon, I viewed multiple posts from Daevon showing a large quantity of marijuana and United States Currency. Also in the posts, Daevon talks about selling narcotics, specifically marijuana and "carts". "Carts" is a term known to detectives that is used to describe vape cartridges containing THC. Daevon mentions specifically selling narcotics at school.

On 12/27/2024, I observed a post that showed what appeared to be "carts" as well as United States currency. In that post are the captions "I sold them nicks and them dimes at the school" "next load probably my last load. im on sum grown man money shi i put in work to get my self out this shi if you wanna trap foreva u a fool" and "but next load we going dum". These captions mean that Daevon has been selling narcotics at school and that he plans to stop selling narcotics but his last load of narcotics will be a big load. (Attachment C)

On 12/27/2024, I observed a post that shows Daevon in possession of a large amount of United States Currency. (Attachment D)

On 12/27/2024, I observed a post that showed a green leafy substance believed to be marijuana with the captions "Candy smoke b here next year" and "Medical substance only". This post indicates that Daevon will have a specific strain of marijuana after the new year and the second quote is a label often intended to thwart law enforcement from using the photo as evidence of the item being an illicit item. (Attachment E)

On 12/27/2024, I observed a post showing a large quantity of United States Currency laying across the abdomen of an unknown elderly female in bed. (Attachment F)

On 12/31/2024, I observed a post that showed a large amount of money on a wooden surface. This currency appears to be packaged in the same manner as the previously described currency. (Attachment G)

On 12/31/2024, I observed two posts that showed a green leafy substance believed to be marijuana. The first had the caption "cherry pop" and "medical substance". (Attachment H)

On 12/31/2024, I observed a post that showed the ceiling inside a house and the caption stated "Throwing deals all day". This language indicated that Daevon is offering special pricing on his illicit narcotic sales. (Attachment I)

Request to seize archived data records

Your affiant knows through training and the experience of other law enforcement officers that websites, online services, and mobile apps commonly store archived data. The social media posts observed function in a manner which deletes the post after twenty-four hours but is stored in the account history. Your affiant knows the archived data to be pivotal as regular users, let alone criminals avoiding detection, often post temporarily for the purpose of avoiding photographs to be stored to their primary account's wall which is seen every time their account is selected. Your affiant would also like archived data as the post has already disappeared from the account and your affiant would like the original posting uploaded by its user.

Request to seize linked accounts records

Your affiant knows through training and the experience of other law enforcement officers that websites, online services, and mobile apps commonly allow users to maintain multiple user accounts. Your affiant also knows through training and experience that social media users often utilize multiple accounts for the purposes of posting applicable content to a certain audience. Criminals often utilize multiple accounts for the purposes of avoiding detection and making identification difficult. Your affiant requests data stored related to linked accounts for the purpose of identifying any and all accounts associated with this primary account where criminal activity was observed the data will assist in identification and also identifying other accounts where criminal activity may be taking place.

Request to seize communication content records

Based on your affiant's training and investigative experience, your affiant knows that Instagram Messenger can potentially be used as evidence in a criminal narcotics investigation in several ways. For example, if a suspect is

communicating with others about the sale or distribution of illegal drugs through Instagram Messenger, the messages and any accompanying media (such as photos or videos) could be used as evidence against them. Similarly, if the suspect is using Instagram Messenger to coordinate drug deals or make arrangements with others involved in the illegal activity, the messages could serve as evidence of their involvement. Additionally, Instagram Messenger could potentially be used to gather further evidence, such as by finding connections between the suspect and other individuals involved in the narcotics trade or by locating additional information that could be used to build a case against the suspect.

Request to seize device and user agent information records

Your affiant knows through training and the experience of other law enforcement officers that websites, online services and mobile apps commonly retain information about the electronic devices used to access them. This information can be valuable in investigations as it uniquely identifies the computer or mobile phone used to access Meta Platforms Inc. (Instagram). Device information commonly includes the make and model of the device, specific identifiers like the International Mobile Equipment Identity (IMEI), International Mobile Subscriber Identity (IMSI), or Media Access Control (MAC) address and in some instances contains browser fingerprinting data like the browser type, screen resolution, and language. Your affiant knows that it would be extremely useful to know what device the suspect used before contacting them. Additionally, knowing what devices were used to connect to Meta Platforms Inc. (Instagram) will help with specificity requirements of future search warrants that seek to collect the physical electronic devices related to this investigation.

Request to seize IP address logs

Your affiant knows that an Internet Protocol (IP) address is a numerical label assigned to devices communicating on the Internet and that the Internet Assigned Numbers Authority (IANA) manages the IP address space allocations globally. An IP address enables the methods of communication between devices on the Internet; it is a number that uniquely identifies a device on a computer network and, using transport protocols, moves information on the Internet. Every device directly connected to the Internet must have a unique IP address. Simply put, an IP address is similar to the mailing address of a house. To mail a letter to a person, you must know that address where the letter is to be sent. In order to receive a response, the envelope must contain the original senders address so that the recipient knows where to respond.

An IP address is typically comprised of four series of numbers separated by periods and is most commonly represented as a 32-bit number such as 54.71.229.212, known as an Internet Protocol Version 4 (IPv4). A newer version, IPv6, is swiftly becoming the standard and is represented as a 128-bit number such as 2001:db8:0:1234:0:567:8:1.

In most instances, consumers purchase internet service through an Internet Service Provider ("ISP"). The ISP then provides IP addresses to the consumer. IP addresses are owned by the Internet Service Provider and leased to a subscriber/customer for a period of time. They are public and visible to others as you surf the Internet. The lessee has no expectation of privacy due to the public nature of IP addresses. There are many publicly available websites that allow anyone to look-up the owner of an IP address. The IP address contain information on the geographic location of the connection. There are two different types of Internet Protocol addresses. The first is a dynamic IP address, which means the user's IP address may change each time they log on to the Internet. The frequency in which this address changes is generally controlled by the Internet Service Provider and not the user. The other type of IP address is a static IP address, which means that a user is assigned a specific IP address that remains constant every time they log on to the Internet. Static IP addresses are traditionally used commercially and are expensive, making them rarely seen in residential accounts.

There are services that allow individuals obscure the IP address issued by their ISP, called Virtual Private Networks ("VPNs"). A individual who uses a VPN routes their internet traffic through the VPN's IP address so the publicly available IP address points to the VPN and not the consumer's actual ISP. VPN's allow individuals to make it look like they are connecting to the internet from anywhere in the world.

As it relates to this case and investigation, your affiant knows that Meta Platforms Inc. (Instagram) maintains a log of IP addresses related to the Target Account. This data is obtained when a user accesses their account by logging in and in some instances when action are taken by the user. Your affiant believes that obtaining IP

address information from Meta Platforms Inc. (Instagram) will assist in locating the suspect and connecting their online activity to their identity.

Request for pen register and trap & trace order Your affiant knows that the companies(s) have the technical capability to install and use both a Pen Register and a Trap and Trace Device. Pen Registers are used to register numbers or accounts that the target has communicated with and record the length of the call. A Trap and Trace Device is used in conjunction with a Pen Register to capture and record the account identifiers of incoming calls such as the username of telephone number. Together, these tools provide investigators with a more complete view of the people that the suspect is communicating with. It is important to note that Pen Register and Trap and Trace Device only record the account identifiers and cannot capture call or message content. Your affiant also knows that it is common for persons who are involved in criminal activity and suspect they may be the focus of a law enforcement investigation to change their account names or usernames. This is frequently done in an attempt to thwart the investigation under the belief that the new identifier will be difficult if not impossible to determine. Your affiant knows through both training and experience that telecommunication service providers can track mobile phones through device identifiers such as Electronic Serial Number (ESN), International Mobile Subscriber Identity (IMSI), and International Mobile Equipment Identity (IMEI) and serial numbers. Any attempt to change a username is recorded as the normal course of business and can be provided to your affiant with a search warrant.

Order to Seal Non-Evidentiary Information

As required by privacy act provisions, items that are within the scope of this warrant will be copied and retained by investigative agency. Investigating agents will then seal any information from the device that is unrelated to the objective of the warrant and will not further review the information pending an order from the Court.

Request for Certificate of Records Order

In compliance with privacy act provisions, your affiant requests that the Service Provider listed in the search warrant provide a valid "Certificate of Records" document consisting of an affidavit and that the document be returned to the affiant along with a copy of the requested records.

Request for Seized Property Return Order

Your affiant is aware that property or items seized under a warrant must remain in the custody of the officer until directed otherwise by the court to which the proceedings are returned, or by any other court with jurisdiction over the offense related to the seized property. Your affiant believes that documenting the items and/or retaining digital copies of their contents can adequately protect the interests of the property owners while also serving the Government's prosecution efforts. Therefore, your affiant respectfully requests that the court authorize the officers executing this warrant to either return the seized items to any known victim(s) after photographic or digital recording them. In instances where the property is inappropriate to return or legal ownership cannot be determined, your affiant requests the authority to dispose of such items in accordance with the law, all without the need for an additional court order upon adjudication of this case.

Request for Non-Disclosure and Target Notification Delay

It is requested that neither the law enforcement officer(s) who execute this warrant nor Provider be ordered to notify any person (including the subscriber, customer or owner of the electronic communication or device information to which the materials relate) of the existence of this warrant for 90 days or there is sufficient reason to believe that the threat cited below will not occur. Your affiant believes that notification by the Service Provider would result in otherwise seriously jeopardizing an investigation or unduly delaying a trial.

Your affiant is aware that companies often have a policy of notifying their customers shortly after receipt of process such as a search warrant. Your affiant believes notification to the suspect of receipt of this Search Warrant would cause them to become aware of the law enforcement investigation which may cause them to conceal, secrete, delete, destroy or encrypt the very evidence this affidavit for search warrant seeks to retrieve and preserve. Your affiant also believes the suspect may attempt to dissuade witnesses from cooperating with the law enforcement investigation and/or testifying in court. Notification would also allow the suspect to conspire with others to create alibis and fabricate a version of events to avoid successful prosecution. Each of these actions would seriously jeopardize the investigation and may lead to an undue delay of the prosecution. Therefore, your affiant requests the company(s) identified in the search warrant be prevented from disclosing the existence of the Search Warrant to the suspect or any other person not directly involved with complying pending until further order of the Court.

Experience of Affiant

Your affiant attended the Walter's State Basic Police Recruit Academy in 2014 where I received 463 hours of initial training. This training is the basic training required by the Tennessee Peace Officer Standards and Training Commission (POST) to be certified in Tennessee as a Police Officer. Since this time, I have maintained at least 40 hours annually of required continual training to maintain my certification. I have also received specialized training in DUI, Interviews and interrogation, Identification and collection of evidence, topics pertaining to law, search and seizure, Basic criminal investigations, robbery, death investigation, property crimes, computer crimes, financial crimes, gang investigations, and sexual assault. Your affiant is a member of the Tennessee Gang Investigators Association.

Your affiant is currently assigned to the Knox County Sheriff's Office, Juvenile Crimes Unit (JCU). Prior to my appointment to JCU, I was assigned to the Patrol Division for 6 years. During that time, I served on the general patrol unit as well as a school resource officer. I have also served in multiple special assignments including the Organized Retail Crime Holiday Shoplifting Task Force and the Property Crimes unit to assist in a high-profile theft investigation.

I SWEAR THE FOREGOING IS TRUE UNDER PENALTY OF PERJURY.

SEARCH WARRANT

**COUNTY OF KNOX
STATE OF TENNESSEE**

FILED
BY MIKE HAMMOND

JAN 09 2025

MIKE HAMMOND, CLERK:

JAN 06 2025

TO ANY PEACE OFFICER WITHIN OR OF SAID COUNTY:

KNOX COUNTY CRIMINAL COURT
KNOXVILLE, TN

KNOX COUNTY CRIMINAL COURT
KNOXVILLE, TN

Proof by Affidavit having been made before me by **Detective David West** of the **Knox County Sheriff's Office** that there is probable cause to believe that certain evidence of a crime, to wit: violations of state law(s) as set forth in TCA Section(s) 39-17-401 of the Tennessee Tenn. Code Ann. §, Tennessee Drug Control Act of 1989, will be found within the premises further described in Attachment A, and the evidence to be searched for further described in Attachment B:

YOU ARE HEREBY COMMANDED to make an immediate search of the premises further described in Attachment A, and if you find the same or any part thereof, you shall seize the evidence and make lawful disposition thereof.

I HEREBY CERTIFY THAT I HAVE DELIVERED THIS SEARCH WARRANT FOR EXECUTION TO:

Det. David West, KCSO at 1518 o'clock P M, on this 31st day of December, 2024.

Judge of Knox County Criminal Court

FOR THE FOLLOWING RECORDS:

Records from the above listed Service Provider for the Account: **srt_daevon**

Each of the types of records specified below shall be from the date the account was created until 12/31/2024 2359 EST for evidence related to the crime(s) of: 39-17-401 of the Tennessee Tenn. Code Ann. § to wit: Tennessee Drug Control Act of 1989.

Archived data: Archived copies of the target Instagram pages/profiles or User Content to include photos, videos, chat communication, messages, friend lists, profile information, and files.

Badge Records: Records of Badges either purchased and used by the Target Account or, Badges purchased to support the Target Account while streaming live video. For Badge purchase records these records shall include dates and times of the purchases, amounts, and creator that the Badge(s) were purchased for. For Badges earned, these records shall include logs of Badges received, total amounts, and records of Badges being exchanged for currency.

Linked accounts: Records of all linked external accounts (such as Twitter or Facebook) or associated email address, username, user ID numbers, or contact information.

Subscriber Information: Subscriber information to include the Target Account's provided name, user and vanity name, user identification number, birth date, email address, telephone number, verification status, linked websites, and the contents of their "About Me" profile statement. Such records shall also include contact point changes that specify the previous contact information.

Communication Content: Records of the communications, photo comments, or other data that would constitute other electronic communication information by the Target Account to include the content of the messages. Such records shall include deleted communications and recorded IP addresses for when the message was sent, if available.

Friends List: Records of friends that the Target Account has added through the use of the Instagram "Find friends" feature either through their contacts list, third-party social media sites, or through a name search of Instagram usernames and data that indicates the method in which they were located if available.

Device and user agent information: Records of the device(s) used by the Target Account to access Meta Platforms Inc. (Instagram) services to include make and model, device IDs such as IMEI, GAID or IDFA as well as recorded user agent strings for the dates indicated.

IP address logs: Information related to IP addresses used for the creation of the Target Account as well as IP addresses used to access to Meta Platforms Inc. (Instagram) apps and services or where the user took actions like uploading files or sending messages. Such records should include the dates and times of such events.

Threads Records: Records of the Target Account's Instagram Threads activity to include posts, comment text, links, photos, and videos as well as details about the thread and the original poster.

Location data: Information associated with files posted by the user that contains location data, including but not limited to, latitude & longitude data, GPS coordinates, or associated IP address.

Log Data: Records that Instagram servers automatically record in logs files to include web requests, browser type, referring / exit pages and URLs, number of clicks and how the Target Account interacted with links on the Service, domain names, landing pages, pages viewed, and other such information, and information collected from emails sent to the Target Account and data that indicates which emails were opened and which links were clicked.

Photos and Videos: Stored photos and videos with their associated metadata, EXIF data, & geolocation data uploaded by the Target Account.

Authorization to implement special procedure(s): The Affidavit filed herewith has demonstrated legal justification for the implementation of the following special procedures which shall be employed by the officers who execute this warrant:

Tennessee Electronic Service Provider ORDER

Pursuant to 2021 Tennessee Public Chapter 421, Tenn. Code Ann. § 40-6-111, the listed service provider is ordered to provide the data described herein within twenty (20) days from the date this Search Warrant is issued. Further, the deadline for seeking relief is not altered by the applicant's consent to additional time to respond to this Process.

This Court has jurisdiction to issue the requested warrant because it is "a court of competent jurisdiction" as defined by 18 U.S.C. § 2711. 18 U.S.C. §§ 2703(a), (b)(1)(A) & (c)(1)(A). Specifically, the Court is a State Court of Tennessee and has jurisdiction over the offense being investigated. Pursuant to 18 U.S.C. § 2703(g), the presence of a law enforcement officer is not required for the service or execution of this warrant.

Certificate of Records ORDER

IT IS HEREBY ORDERED that the Service Provider listed in the search warrant shall provide a valid "Certificate of Records" document consisting of an affidavit and that the document be returned to the affiant along with a copy of the requested records.

Five Business Day Record Production ORDER

IT IS HEREBY ORDERED that the organizations described in this search warrant shall produce the requested records within five (5) business days of receipt of this search warrant.

Property Return and Destruction ORDER

IT IS HEREBY ORDERED that any property or things taken pursuant to this warrant that have been determined to not contain relevant evidence or that have been photographically or digitally recorded shall be disposed of, returned to the known victim(s) or property owners or appropriately dispositioned in accordance with law without the necessity of further court order upon adjudication of this case.

Pen Register and Trap Trace Order

IT IS HEREBY ORDERED THAT Meta Platforms Inc. (Instagram) shall install and use a pen register or a trap and trace device to provide metadata information, facilities, and technical assistance to accomplish the unobtrusive interception of dialing, routing, addressing, and signaling records associated with the Target Account with a minimum of interference to the services provided by Meta Platforms Inc. (Instagram). The pen register / trap and trace is to be installed and used within the jurisdiction of this court and shall collect information not revealing the content of message communication or public posts, but more generally provides information that the communication took place as prescribed in 18 U.S.C. §§ 3121(c). This information shall be collected by any means available that will provide data regarding both sent and received messages to include their associated account identifiers, dates and times, associated IP addresses or phone number, and originating device information. The identification of users that the Target(s) communicated with shall be limited to the username, excluding Basic Subscriber Info

IT IS FURTHER ORDERED that the use of both the Pen Register and Trap and Trace shall be for the period of thirty (30) days from the execution of this order unless the affiant or a representative of the Knox County Sheriff's Office requests their use be ended prior to the expiration of this Order.

California's Prohibited Violation Attestation

In compliance with the requirements outlined in California Penal Code § 1524.2(c) & § 1546.5(a) your affiant attests that the evidence sought in this search warrant is not related to an investigation into, or enforcement of, a prohibited violation as defined in California Penal Code § 629.51.

Non-Disclosure ORDER

The affidavit herein has established sufficient reason to believe that immediate compliance with notification requirements would result in otherwise seriously jeopardizing an investigation or unduly delaying a trial.

IT IS HEREBY ORDERED that, pursuant to 18 U.S.C. § 2705(b), that the existence of this application,

search warrant, or the underlying investigation shall not be disclosed to any person unless and until authorized by the Court. This non-disclosure order is issued for the reasons and under the authority detailed in the application.

Target Notification Delay ORDER

IT IS HEREBY ORDERED that notification of the service of this search warrant to the target/party shall be delayed for a period of 90 days. Upon expiration of the period of delay of the notification, the Knox County Sheriff's Office shall provide a notice document that includes a copy of this search warrant.
